SKILLS

Unity / Client

- C#Unity
- ScriptableObject
- AddressablesDOTween
- UI systems

Monetization & Analytics

- Unity IAPAdMob
- Firebase Analytics

Backend

- PlayFabAzure Functions
- Node.jsJavaSQL
- NoSQL

Tools & Publishing

- GitGitHubGitLab
- Google Play Console
- App Store Connect

Familiar with

- SpineURPDocker
- CI/CDMicroservices

EDUCATION

Industrial University of Ho Chi Minh City
B.Eng. Software Engineering
GPA 3.07/4.0 · 2025

LANGUAGES

Vietnamese — native
English — TOEIC 615

Unity Developer with nearly 2 years of mobile game development at PapaGroup, working across both client and server: gameplay, UI and monetization (Unity IAP, AdMob) in Unity, plus secure server-side logic on PlayFab + Azure Functions. Shipped 3 titles to Google Play and single-handedly built 10+ hyper-casual/midcore games from design docs, averaging 1–2 weeks per game. Comfortable working independently and owning a game from GDD to finished build.

WORK EXPERIENCE

PapaGroup · Ho Chi Minh City · Nov 2024 – Sep 2026

Junior Unity Developer

Mar 2026 – Sep 2026

Bo Lac Dau Phong · Google Play ↗

- Owned the server side of core live systems (IAP, rewarded ads, Battle Pass, Quests) on PlayFab + Azure Functions
- Implemented server-side IAP receipt validation and server-verified ad-reward granting to block client-side cheating
- Built the base UI framework, finished game screens and gameplay logic in Unity; fixed bugs through release

Gbox · enterprise gamification app · submitted for store review

- Took over the project mid-development; delivered food & drink ordering, table booking and donation features, tied into an XP and player-stats progression layer

Unity Developer (Fresher)

Jul 2025 – Feb 2026

- Single-handedly developed 10+ hyper-casual and midcore games from designer GDDs (gameplay, UI, in-game economy and progression), averaging 1–2 weeks per game

Draw Adventure · Google Play ↗

- Integrated Unity IAP and AdMob; built gameplay features and UI; fixed bugs for live release

Unity Developer Intern

Nov 2024 – Jun 2025

Aquex · Fish Battle Royale PvP · Google Play ↗

- Integrated Unity IAP and AdMob; worked with the backend team to wire server logic into the game UI
- Contributed gameplay features and bug fixes ahead of launch

SELECTED SOLO PROJECTS

ttd2002.github.io/game-demo-reel ↗

Drill Frenzy · hyper-casual · closed testing on Google Play

- One-touch drilling core loop with combo-triggered power mode, built around a full retention meta: dual currency, stat upgrades, skins, pets with active skills
- Treasure chests with a pity system, collection albums, daily login calendar, daily/weekly quests, achievements, leaderboard and limited-time events
- Rewarded ads, in-game shop, in-app review prompt, EN/VI localization, haptics, auto-save
- Built Android releases and managed the closed-testing track on Google Play Console

Also: **Merge of Fates** (merge + auto-battler), **Norte Droc** (hospital tycoon), **Kiasth Rosht** (turn-based shooter) and 6 more arcade titles. Gameplay videos at the demo reel.
