SKILLS

Unity / Client

- C#Unity
- ScriptableObject
- AddressablesDOTween
- UI systems

Monetization & Analytics

- Unity IAPAdMob
- Firebase Analytics

Backend

- PlayFabAzure Functions
- Node.jsJavaSQL
- NoSQL

Tools & Publishing

- GitGitHubGitLab
- Google Play Console
- App Store Connect

Familiar with

- SpineURPDocker
- CI/CDMicroservices

EDUCATION

Industrial University of Ho
Chi Minh City
B.Eng. Software Engineering
GPA 3.07/4.0 · 2025

LANGUAGES

Vietnamese — native
English — TOEIC 615

Unity Developer with nearly 2 years of mobile game development at PapaGroup, working across both client and server: gameplay, UI and monetization (Unity IAP, AdMob) in Unity, plus server-side logic on PlayFab + Azure Functions. Contributed to 3 titles released on Google Play and independently developed 10+ hyper-casual/midcore games from design docs, averaging 1–2 weeks per game. Comfortable working independently and taking responsibility for development from GDD to a finished build.

WORK EXPERIENCE

PapaGroup · Ho Chi Minh City · Nov 2024 – Sep 2026

Junior Unity Developer

Mar 2026 – Sep 2026

Bo Lac Dau Phong · Google Play ↗

- Developed and maintained server-side logic for core live systems: IAP, rewarded ads, Battle Pass and Quests (PlayFab + Azure Functions)
- Implemented server-side IAP receipt validation and server-verified ad-reward granting to block client-side cheating
- Built the core UI framework, completed game screens and implemented gameplay logic in Unity; resolved bugs throughout development and release

Gbox · enterprise gamification app · submitted for store review

- Took over the project mid-development; delivered food & drink ordering, table booking and donation features, integrating them with the XP and player-stat progression systems

Unity Developer (Fresher)

Jul 2025 – Feb 2026

- Independently developed 10+ hyper-casual and midcore games from designer-provided GDDs, implementing gameplay, UI, in-game economy and progression systems, averaging 1–2 weeks per game

Draw Adventure · Google Play ↗

- Integrated Unity IAP and AdMob; built gameplay features and UI; fixed bugs for the production release

Unity Developer Intern

Nov 2024 – Jun 2025

Aquex · Fish Battle Royale PvP · Google Play ↗

- Integrated Unity IAP and AdMob; collaborated with the backend team to connect server-side functionality with the Unity UI
- Contributed gameplay features and bug fixes ahead of launch

SELECTED PROJECTS – INDEPENDENT, END-TO-END

Demo reel ↗

Drill Frenzy · hyper-casual · closed testing on Google Play

- Developed a one-touch drilling loop with a combo-triggered power mode, built around a full retention meta: dual currencies, stat upgrades, skins and pets with active skills
- Implemented treasure chests with a pity system, collection albums, a daily login calendar, daily and weekly quests, achievements, a leaderboard and limited-time events
- Added rewarded ads, an in-game shop, in-app review prompts, English and Vietnamese localization, haptic feedback and automatic progress saving
- Created Android release builds and managed the closed-testing track in Google Play Console

Additional projects include **Merge of Fates** (merge and auto-battler), **Norte Droc** (hospital tycoon), **Kiasth Rosht** (turn-based shooter) and six other arcade titles. Gameplay videos are available in the demo reel.
